

Printing instructions for *A tribute to children's books*

Printing files

Printing files will be sent from SI upon received and confirmed application form. Translation may be needed.

Exhibition module version

You will need to construct between 1 and 5 exhibition modules depending if you want to use all pictures or not. You have to use the introduction print and at least 5 illustrations. You can also use only one module including the introduction on one side and the collage of all the pictures on the three other sides. Please look at the [exhibition overview](#). If you use all pictures and all 5 modules there will be two sides open at the end. In the last module you can build a shelf where you put Swedish children's books for visitors to look at and read.

See the [the exhibition module](#) toolkit for information on how to construct the modules.

The prints to be mounted on the modules are 700x1000 mm on a 5 mm thick, matte laminated Kapa or Forex board. Forex is preferred if you are using an exhibition more than one time.

Exhibition hanging on the wall

The exhibition can be printed in sizes A3, A2, A1 or A0. All in one size or a combination of sizes. You need to include the intro and at least five illustrations. You can print them on 5 mm Forex and attach them on the wall.

The exhibition can be printed in size A3 for a smaller exhibition. The exhibition should preferably be printed on a premium uncoated paper such as the Multidesign Original White (http://www.papyrus-multi.com/fr_CH/assortment/multidesign/sheets). Paper weight should be 300 g. The exhibition is then hung on a string attached to the wall. Make sure it looks good!

You can also hang the A3 exhibition printed on the paper above in IKEA frames – please use black or white frames only.
