

# HOW TO EMBED THE VIRTUAL EXHIBITION ON A THIRD PARTY WEBSITE

Just like any YouTube video, it is possible to embed the virtual exhibition on any website with an iframe code. Follow the steps below to embed the experience on any website.

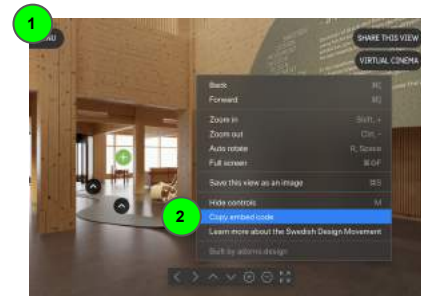

1. Go to [swedishdesignmovement.com](https://swedishdesignmovement.com) and right-click on the screen
2. Select "Copy embed code" in the pop-up menu
3. Go to your website editor (CMS) and paste the embed code in a HTML text editor
4. Save the page and now the virtual exhibition should be visible on the page you edited.

As a default the experience is embedded in 640px wide and 480px tall. This can be modified by changing these numbers in the embed-code. The higher the number is, the larger the window will be:

width="640" height="480"

or by percentage size of the screen:

width="100%" height="40%"

```
<iframe src="https://swedishdesignmovement.com"
width="640" height="480" frameborder="no"
scrolling="no" allow="accelerometer; autoplay;
gyroscope" allowfullscreen></iframe>
```

## Swedish Design Movement

26 JUL 2021

Swedish Design Movement brings together players in Swedish design, fashion and architecture who are spearheading the transition to sustainability. The initiative seeks to put Sweden on the international design map, raise the profile of sustainable Swedish businesses and set a global example.

Virtual Exhibition

Swedish Design Movement has been part of the government's export and investment strategy since 2016. It is now stepping up its drive to boost outside interest in Swedish design and accelerate demand for sustainable goods and services from Sweden. The first step is to raise Sweden's profile as a design nation through a
